

Anatomy Final Project Choices

1. Narrative of a food molecule traveling through the digestive system.

- The narrative clearly, specifically, and accurately shows the path through the digestive system of the body (25 points)
- Name how 5 other systems are involved and give an accurate description of how they are involved (12 points per system)
 - Creativity (15 points)

2. PowerPoint of 5 organs that are considered to be part of multiple systems of the body.

20 points for each organ

- 5 points for image of organ and description of structure
 - 5 points for cells and tissues that make it up
 - 5 points for function of organ
- 5 points for description of systems it is a part of and why

3. Art- 5 drawings illustrating how 2 or more body systems work together.

20 points per drawing

- 10 points for drawing/art itself
- 10 points for some type of caption describing how the two or more systems you chose for that art do work together
